#### DETAILED ACTION

#### Response to Arguments

1. Applicant's arguments, see Paper #6, page 6, line 27 - page 10, line 3, filed 11 February 2004, with respect to the rejections of claims 1, 3, 7, 9, 11, 15, 17, 19, & 23 under 35 USC § 102 and the rejections of claims 2, 4-6, 8, 10, 12-14, 16, 18, 20-22, & 24 under 35 USC § 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, new grounds of rejection are made as set forth below.

## Claim Rejections - 35 USC § 102

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Claims 1-3, 7-11, 13, 15-19, & 23-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Dobbs.

Re claims 1, 7, 9, & 17, Dobbs discloses (column 2, lines 12-61) a computer processor and printer arrangement that generates a test data structure (i.e. a test pattern and associated icon) for testing a printer driver by opening the associated application (the print control system) and document (the test pattern) in order to produce a test print from the test data structure.

Application/Control Number: 09/495,459 Page 3

Art Unit: 2624

Re claims 2, 10, & 18, Dobbs discloses (column 3, lines 22-23) the selection of one of several print options.

Re claims 3, 11, & 19, the described user-selected icon (column 2, lines 54-55) indicates the use of a graphical interface.

Re claims 8, 16, & 24, Dobbs discloses (column 3, lines 27-31) the generation and recording of a compatible print mode log.

Re claim 13, Dobbs discloses (column 2, line 62 - column 3, line 10), an auto-learning arrangement whereby the printer driver is equipped with learned controls corresponding to particular print media types.

### Claim Rejections - 35 USC § 103

- 4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 5. Claims 4-5, 12, 14, 20, & 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dobbs in view of Koppolu et al.

Dobbs does not disclose the use of a registry database to associate applications and documents. The use of a registry database to associate applications and documents is known in the art as disclosed by the Koppolu et al. description (column 1, lines 59-63) of the Windows  $95^{\text{TM}}$  registry. The use of a registry database to associate applications and documents in the printer

Art Unit: 2624

driver test arrangement of Dobbs in order to permit documents of various file formats to be used as test patterns would be an expedient obvious to one of ordinary skill in the art.

6. Claims 6 & 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dobbs in view of Weinberger et al.

Re claims 6 & 21, Dobbs further discloses (column 2, line 62 - column 3, line 10), an auto-learning arrangement whereby the printer driver is equipped with learned controls corresponding to particular print media types.

Dobbs discloses the use of a single printer driver. The use of multiple installed printer drivers on a computer system and the selection of a printer driver for a given print job is well known in the art as shown for example by Weinberger (column 4, lines 24-29). The use of such multiple printer drivers in Dobbs to allow the use of multiple printers connected to a single computer would be an expedient obvious to one of ordinary skill in the art.

#### Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen M. Brinich at 703-305-4390. The examiner can normally be reached on weekdays 7:00-4:30, alternate Fridays off.

Application/Control Number: 09/495,459

Art Unit: 2624

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Tech Center 2600 Customer Service center at 703-306-0377.

If attempts to contact the examiner and the Customer

If attempts to contact the examiner and the Customer Service Center are unsuccessful, supervisor David Moore can be contacted at 703-308-7452.

Faxes pertaining to this application should be directed to the Tech Center 2600 official fax number, which is 703-872-9306.
